

GAURAV RAI

AI, Data and Cloud Analyst and Engineer

Melbourne, VIC | gauravraiau@gmail.com | [linkedin.com/in/gauravraiiji](https://www.linkedin.com/in/gauravraiiji) | gauravraiiji.vercel.app

SUMMARY

Analyst with more than six years across contact centres, IT support, reporting and cloud. At Bendigo Telco I rebuilt customer experience reporting in SQL and Power BI and worked on Amazon Connect, where I took WhatsApp, Facebook Messenger and Instagram messaging from pilot to production. Earlier I led a team of fifteen agents and lifted CSAT from 82% to 91% in six months. I use AI tools every day, including Claude Code and Codex. Based in Melbourne and available now.

SKILLS

Data and reporting | SQL, Power BI, Excel, MSPBots, Python, data validation, requirements gathering, CSAT, AHT and SLA reporting

Amazon Connect and AWS | contact flows, routing profiles, Contact Control Panel, WhatsApp and social messaging, Lambda, DynamoDB, CloudWatch, CloudTrail, Terraform

AI | Claude Code, OpenAI Codex, Claude and OpenRouter APIs, MCP, prompt engineering

Tools | TypeScript, React, Node.js, Docker, PostgreSQL, GitHub Actions, Jira, HaloPSA

EXPERIENCE

Bendigo Telco | Bendigo, VIC

Reporting Analyst, Customer Experience | Aug 2025 to Sep 2026

- Rebuilt customer experience reporting in SQL and Power BI, replacing hand built spreadsheets with weekly CSAT, AHT and SLA dashboards for managers.
- Gathered reporting requirements across the business, checked data quality before every release and raised data risks through the risk framework.
- Maintained dashboards in Power BI, Excel and MSPBots, and supported the Amazon Connect rollout by moving its configuration into Terraform.

CX Enablement Intern | Mar 2025 to Jul 2025

- Connected WhatsApp, Facebook Messenger and Instagram to Amazon Connect from pilot to production, with Node.js Lambda functions and DynamoDB handling real time chat routing.
- Built a React and TypeScript panel in the agent workspace that loads the HaloPSA customer record on call pop, cutting average handle time by 25%.
- Rebuilt AWS monitoring after a root account compromise with CloudTrail, CloudWatch and Budgets alerts, and moved all Jira tickets into HaloPSA with no data lost.

Oceaneering International Services | Chandigarh, India

IT Support Analyst, contract | Mar 2023 to Jul 2023

- Supported 200+ business users across 24x7 rotating shifts and closed 95% of Level 1 and Level 2 tickets within SLA.
- Built ticket reports in Python and SQL that exposed the top five recurring issues, and fixing them cut repeat incidents by 20%.

Future Work Technologies | Chandigarh, India

Team Lead | Jan 2022 to Jan 2023

- Led fifteen agents across voice, email and chat, lifting CSAT from 82% to 91% in six months with QA scripts and KPIs.
- Reworked scheduling and used Excel and SQL reports to find bottlenecks, cutting wait time by 20% and resolution time by 15%.

eClerx | Chandigarh, India

Senior IT Support Analyst | Apr 2021 to Jan 2022

- Managed daily operations and sales targets for eight automotive dealerships with five analysts reporting to me.
- Built a CRM escalation workflow that cut escalations by 25%, and trained 20+ new hires, lifting first contact resolution by 15%.

IT Support Analyst | Aug 2018 to Mar 2021

- Handled 50+ customer enquiries a day at 95% retention and received the Extra Miler award and Employee of the Quarter.

PROJECTS

HoundShield | houndshield.com | Feb 2026 to present

- A prompt inspection firewall I built solo with Claude Code and Codex. It checks AI prompts for sensitive data on the customer's own hardware, runs 16 detection engines and is covered by 140 test suites.

EDUCATION

Master of Information Technology, Cloud Analytics | La Trobe University | Jul 2023 to Jul 2025

Bachelor of Computer Applications | Punjabi University | Jun 2015 to Jun 2018

CERTIFICATIONS

AI Fluency, Framework and Foundations, Anthropic, Jul 2026 | Data Analytics Essentials, Cisco Networking Academy, Sep 2026
